

# COMSAT, Inc.

Revolutionary, high-speed connectivity with enhanced security and support services for all your maritime operations.

COMSAT offers the complete range of products and convenient services to support your maritime business efficiently. From sending and receiving files to talking, texting and accessing the Internet, COMSAT delivers solutions to meet all your maritime communications needs. And with our top of the line 24/7/365 customer support and enhanced security features, you can consider COMSAT your one stop resource for all your at-sea connectivity needs.

## FleetBroadband

FleetBroadband provides seamless, broadband connectivity across the world's oceans. It provides guaranteed on-demand data rates of up to 256 kbps for live video and audio applications as well as 8 kbps and 16 kbps for voice over IP (VoIP) applications. We also offer and support Fleet F33/55/77 and Inmarsat C Services that includes GMDSS requirements.

## COMSAT Xpress™

COMSAT's offering on Inmarsat's Global Xpress – Global Xpress is the first and only globally-available, high-speed Ka-band satellite network owned and managed by a single operator. This ensures that ships using COMSAT Xpress experience a continuous, consistent service as they move across the globe.

## Iridium Pilot®

Iridium Pilot is a maritime communications service offering global voice and IP connectivity at speeds up to 128 kbps. With an always-on Ethernet connection and three voice lines that can be used simultaneously, Iridium Pilot delivers cost-effective and reliable data and voice communications. The service is ideal for merchant, fishing, yachting and shipping fleets.

## Thuraya MarineComms

With coverage expanding approximately 2/3 of the world and 80% of merchant operational areas, Thuraya MarineComms can save nearly half the budget of a comparable service product. From standalone voice to high volume data plans, Thuraya offers the most flexible service options on the market today.

## C- and Ku-bands

Operating in a low frequency range resilient to tropical rain storms, C-band satellite coverage is ideal for global oceanic communications. Ku-band service operates at higher frequencies, providing higher data rates for smaller ship side antenna systems and suitable for regional coverage.

Accounting Authority  
Identification Code – US11

### Advanced Security:

- **Virtual Private Network (VPN)**
- **Network Operations Center (NOC)**
- **Cyber Solutions**

### Additional Features:

- **Tier 1 Distributor for Inmarsat, Iridium and Thuraya**
- **Inmarsat Point of Service Activation (PSA)**
- **Flag Registered**
- **Very Small Aperture Terminal (VSAT)**
- **Crew Welfare**
- **Global Maritime Distress & Safety System**
