

COMSAT IRIS[®]

Now featuring Iridium Certus!

COMSAT IRIS is a web-based account management platform designed for our valued government and commercial customers. Secure and simple to use, IRIS enables our customers to access their account information 24 hours a day featuring a fluid and optimized user interface.

Whether you are managing a government installation or a large commercial project, your team can see Inmarsat, Iridium and Thuraya services (including Inmarsat GX and Iridium Certus) while taking advantage of a number of the COMSAT value-added solutions.

Features:

- See customer outage notifications
- Search and retrieve usage data for specified terminals and SIM cards
- Find details for terminals and SIM cards for user-defined satellite services
- Manage billing and invoicing information to keep up to date on your end customers
- View Fixed-to-Mobile Direct Dialing accounts
- Manage and create end-user access via admin rights
- On-demand status change requests

COMSAT IRIS--Real time account management for government and commercial end users
