FLEET ONE COASTAL FOR LEISURE
Losing signal and getting a slow data connection can make trying to use your mobile phone frustrating. Then there is the risk of roaming on another network and coming home to the shock of a large bill.
Satellite communications is now an affordable option for checking in with the office, or letting the kids update social media and talk to their friends while onboard. With the Fleet One Coastal service, you need never be without connectivity again.

FLEET ONE COASTAL FOR FISHING
Access to communications at sea helps with fishing operations, such as navigation, route-planning and optimization, fish finding, catch reporting, and fisheries e-reporting.
For fishermen, access to low-cost calls and email keeps them in touch with home and boosts morale. They can check the news and sports reports – all while keeping a tight control on costs.

FLEET ONE PREPAID GLOBAL SERVICE

Fleet One Coastal Service was designed to meet specific operational demands for the near-shore cargo, yachting, fishing, and ferry industries. The user is able to connect via data and voice simultaneously through a robust antenna designed for use in the maritime environment. With the Fleet One Coastal Service, you have access to low-cost voice calls and emails to keep in touch with family and friends. You can connect to the internet and access your favorite social media platforms, and apps like WhatsApp, Viber, etc. Prepaid and postpaid plans are available for you to keep the costs of communications affordable.

FLEET ONE POSTPAID GLOBAL SERVICE

Fleet One Global Service was introduced to make satellite communications affordable anywhere around the world. In the past, Global satellite communications were not cost-attractive to all commercial vessels when going on transatlantic voyages. They did not want to commit to long high-cost contracts when the service was only needed seasonally. With Fleet One Global Service, the owners are able to activate a postpaid plan on a month-to-month basis, as well as the Global prepaid option. The customer can rely on a robust terminal designed for the roughest maritime environments together with Inmarsat’s network availability exceeding 99.9%.

Interfaces

- Ethernet (PoE)x2
- RJ-11 / RJ-45
- NMEA-0183 – GPS output
- I/O connector x5 configurable inputs/outputs
- Integral DHCP/NAT router
- Built-in PBX
- TNC female (BDU), N-type female (ADU) – antenna connectors
- SIM card slot

STAY CONNECTED. STAY SAFE.

Always-on connectivity gives you access to email and critical applications, such as real-time electronic charts and weather reporting, wherever you are. Fishing and merchant vessels can transmit regulatory declarations, and save time and money by calling ahead to sell their catch or book in repairs before they get to port.

For seafarers seeking the adventure of longer voyages, Fleet One Global delivers the reassurance of a reliable, simultaneous voice and data connection for business, support services, and staying in touch with family and friends back home – anywhere on the world’s oceans.

In an emergency, Fleet One supports Inmarsat’s free ‘SOS’ safety service, which directs a call straight through to a Maritime Rescue Coordination Centre (MRCC). So you can set sail knowing you are in safe hands.
